

Sealing tape (black)

Single-sided self-adhesive sealing tape for internal noise elimination

Material:

- polyethylene foam

Features:

- suitable especially for joints of load-bearing profiles for drywall construction
- reduces sound transmission within the structure
- compensates unevenness of profiles
- easy application thanks to the self-adhesive layer

Installation instructions:

Clean the surface to which the tape is to be bonded from dust and other separating agents. Remove the protective foil from the self-adhesive layer and bond the tape to a profile. Mount another profile through the tape.

Packaging, storage and transport:

Store at dry and roofed places at the temperatures of + 5°C ~ + 40°C. The maximum storage time is 1 year.

Certification and standards:

The product is not subject to any harmonized standard.

Technical data:

Density	29 kg/m ³
Thickness	3 mm
Temperature resistance	-40 to +80 °C
Tensile strength	790 kPa lengthwise 370 kPa crosswise
Max. elongation	130 % lengthwise 190 % crosswise
Water absorption	max. 1%
Water vapor permeability	9,2 x 10 ⁻⁹ kg/(m ² .s)

Issued on 21 May 2018.

This update invalidates all previous versions of this technical data sheet. The specified product dimensions are nominal and may range within the permitted manufacturing tolerances.
