

Eurovent GUTTER PROTECT

Gutter mesh made of high-quality polymer. Designed to protect gutters against leaves and other wind-driven elements. Single unit is 60 cm long and features bending points that allow application in 90 and 150 mm diameter gutters. Side hooks enable fast and easy installation on the gutter. Product is resistant to weather conditions. Side hooks enable fast and easy installation on the gutter. Product is resistant to weather conditions.

Advantages:

- connectable units side hooks
- UV resistance

Technical data:

Parameter	Value
Material	Polymer
Size	175 mm x 600 mm
Mesh size	8 x 8 mm

Parameter	Value
Color	Black
Cardboard / cardboard weight	5 pcs / ca. 0,325 kg
Palette	640 cardboards / 3200 pcs

Application:

Gutter mesh is designed for use as protective element for plastic and metal gutters. Installed by adjusting its width at bending points and mounting it on the gutter with special side hooks. Individual units can be connected to protect the gutter on its entire length.

Storage / transport:

The product should be stored in a dry place, under cover, free from moisture and UV radiation in original undamaged and closed package. The product should be transported in covered means of transport. They should be prepared for transport in a manner that protects them from damage and destruction. During transport safety regulations must be observed. The product should be protected from chemical agents, in particular solvent-based substances, as they can reduce technical parameters of foil or permanently damage it.

The product is under warranty, providing that the guidelines contained in technical data sheet are being obeyed. We reserve the right to refuse a complaint recognition in case of not following these guidelines.

Contained information, advice and guidance is given based on our knowledge, researches, experiments and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
