

G-EFL

G-EFL edge bead for plasterboards with protective lip for board ending and connection of the board with thickness 12.5 mm and fixation to window, door frame or other surfaces.

Material:

- PVC – UV and alkali resistant
- Two-side adhesive PE foam tape with closed cells

Features:

- For board thickness 12.5 mm
- Elastic adhesive tape for board connection for example to door or window frame where permanently elastic joint is required
- Elastic protective lamella protecting the adhesive tape
- Aesthetic board connection
- Further gap sealing not necessary

Instruction for use:

The application surface has to be cleaned, degreased and flattened thoroughly before the application of the bead. Bead is positioned on the board edge, the protective tape is removed and pressed onto the frame or relevant surface.

Packaging, storage and transport:

Store in a dry place in horizontal position to prevent the profile sagging and deformation.

Certification:

The product is subject to any harmonized standard. The product was voluntarily certified at TZÚS Praha, s.p.

Technical data:

Material	PVC
Colour	White
Bead length [mm]:	2500
Front edge height [mm]:	10
Rear edge height [mm]:	20
